

Two of America's Best Doctors Practice at Evergreen

The Rhyme and Reason

by Blythe Thimsen

Spokane Coeur d'Alene Living

A cough, a sneeze, a blown out knee. A heart palpitation, macular degeneration, a deep laceration. Infections, disease and clogged arteries. A headache, a foggy haze and a general malaise. Sometimes there is no rhyme or reason to the ills we suffer. Finding a doctor to help you get better shouldn't have to be part of the riddle.

When you are feeling ill, sometimes all you need is to be tucked into bed, kissed on the forehead and served a bowl of mom's chicken noodle soup. When that doesn't cut it though, it is time to call in the big guns: the doctors. We think you should go for the gold when it comes to your health, and this list showcases some of the best doctors in our region.

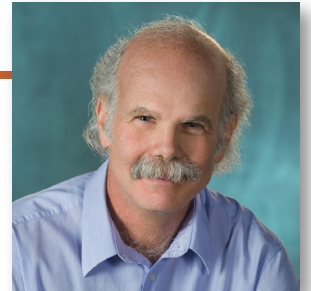

Stephen P. Anthony, DO Molecular Hematologist and Oncologist

Dr. Anthony, who trained as a fellow in the Dartmouth Medical School's Division of Hematology & Oncology, is recognized for his expertise in molecular markers for cancer as well as new drug development.

Howard D. Stang, MD Medical Oncologist and Hematologist

Dr. Stang trained as a fellow in the UCLA School of Medicine's Division of Hematology/Oncology, and has practiced in this field for more than 25 years – most of it in Spokane.

Best Doctors commissions an exhaustive, biennial peer survey of the medical profession that contacts more than 45,000 doctors who are identified in previous research as the "best" in their specialties and asks them: "If you or a loved one needed a doctor in your specialty, to whom would you refer them?" The Best Doctors in America® database includes more than 45,000 doctors in 46 specialties and over 400 subspecialties, representing all 50 states and the District of Columbia. These are the doctors that other doctors recognize and turn to for themselves and their families. And since doctors are not required or allowed to pay a fee to be listed, Best Doctors has gained the respect of the medical profession and patients alike as an unbiased source of top quality medical information.
